

Global services with a **personal touch**

Jim Hildenbrand joined us after more than 30 years in the Development Industry where he served as Senior Vice President and CEO. In addition he has been working as a consultant for Reimler Logistics while we were planning our expansion into the US market.

Reimler Logistics is a worldwide logistics company based in Hamburg, Germany, and offers a full range of logistics services throughout the world. As a result of our ever expanding services and a growing demand for our personal services in the United States, Reimler Logistics is proud to announce the opening of our first US office in the San Francisco Bay Area. Currently, with above 10,000 container shipments, and still increasing, between the USA, Europe, Asia, and South America, plus our well established network for distribution and consolidation throughout Eastern and Western Europe, it is now the right time to offer our clients and prospective future clients those services within the United States, which have led Reimler on the road to success since 1922. Furthermore, Reimler Logistics is specialized in bulk cargo handling and can offer a full range of charter contracts on a global scale. We can offer either part cargo or full charter terms, up to tonnages between 1.000 - 20.000 mt. Bulk cargo in the range of 1.000-2.000 mt per single shipment can actually be stuffed into 20' or 40' Containers - please ask us for competitive rates. Our forwarding strengths are based on container ex- and imports, as well as cross trading and arrangements of pre-/oncarriages per rail, container chassis or tipping trucks (if required) incl. customs formalities. We at Reimler Logistics would love to hear from you soon, and provide you our best global logistics services.

With **you** in mind
